

ASSISTED COMPRESSION DEVICES						
Company	Product	Type	Puncture Size (F)	Maximum Wire Compatability	FDA Approved	Comments
Abbott Vascular	Chito-Seal	Topical hemostasis pads/patches	All	n/a	Yes	n/a
Datascope	Safeguard (12, 24 cm)	Pressure-assisted dressing	All	n/a	Yes	Assists manual compression and maintains hands-free pressure. Adjustable pressure is applied to wound and access sites via an inflatable bulb contained within an adhesive bandage, allowing visibility of the site. Available in two sizes for use anywhere pressure is required.
InterV	V+Pad	Topical hemostasis pads/patches	All	All	Yes	High positive charge attracts negatively charged red blood cells. This process accelerates hemostasis and other bleeding wounds. Reduces manual compression times while providing a visual indicator that hemostasis is occurring.
Marine Polymer Technologies	Syvek Patch, SP, NT	Topical hemostasis pads/patches	All	All	Yes	Indicated for rapid hemostasis at the vascular access site including patients on anticoagulation therapy.
RADI Medical Systems	FemoStop plus	Mechanical compression devices	All	All	Yes	Precise and consistent compression while allowing immediate reaccess to the femoral site
	FemoStop HD	Mechanical compression devices	All	All	Yes	Includes a sterile, hemostatic dressing impregnated with m*doc. Deep and topical hemostasis and immediate reaccess to the femoral site.
	RadiStop	Mechanical compression devices	All	All	Yes	Support plate provides comfortable and efficient positioning of the wrist and mechanical compression and stabilization of the radial artery.

CLOSURE DEVICES

ASSISTED COMPRESSION DEVICES (CONTINUED)

Company	Product	Type	Puncture Size (F)	Maximum Wire Compatability	FDA Approved	Comments
Scion CV / Medtronic	Clo-Sur Plus PAD	Topical hemostasis pads/patches	All	All	Yes	High positive charge attracts negatively charged red blood cells. Water-soluble. Noninvasive PAD is only device FDA approved as an antimicrobial barrier PAD.
St. Jude Medical	StaysPatch	Topical hemostatic pads/patches	All	All	Yes	Provides safe and rapid hemostasis. Reduces manual compression time.
TZ Medical	Neptune	Topical hemostatic pads/patches	All	All	Yes	Calcium alginate wound dressing that facilitates hemostasis after catheterization. Available with Disc or standard 2x2 pad.
	Comfort Band	Compression strap	All	All	Yes	Radial/brachial strap. Comes sterile or non-sterile, with or without Neptune calcium alginate.
	QuicKlamp	Mechanical compression devices	All	All	Yes	To be used with the Neptune Disc or Disco Discs. Inexpensive alternative to holding manual pressure.
	EZ Hold	Compression devices	All	All	Yes	To be used with the Neptune Disc or Disco Discs. Weighted, T-shaped handle provides an alternative to manual pressure and eliminates the long-term effects associated with holding. Reusable.
	Disco Discs	Compression devices	All	All	Yes	Works with all clamp systems on the market. Inexpensive single-use item.
Vascular Solutions, Inc.	D-Stat Dry	Thrombin-coated topical hemostasis pad	All	n/a	Yes	n/a
	D-Stat Radial	Topical/mechanical device with thrombin	n/a	n/a	Yes	n/a
	D-Stat Flowable	Topical hemostat	All	n/a	Yes	Think, flowable hemostat that can be used on any source of active bleeding. Kit includes two applicator tips.
	ThrombiGel	Topical hemostat	All	n/a	Yes	Thrombin plus gelfoam in a composite pad. Just wet and apply to any source of active bleeding.
	D-Stat Clamp Accessory	Topical/mechanical device with thrombin	All	n/a	Yes	n/a
